### I. Discussion

Wilson Telephone Company, Inc. (*Wilson*), an ETC designated by the state of Kansas, hereby submits this five year service quality improvement plan progress report (*Progress Report*) as required by 47 CFR § 54.313(a)(1). Wilson is an incumbent local exchange carrier with a service area in the state of Kansas, with 1,502 access lines in 7 exchanges as of 12/31/2014. Wilson is a rate-of-return (RoR) regulated carrier.

The *Progress Report* reflected herein represents Wilson's ongoing efforts to expand high quality, reasonably-priced broadband services throughout its service area. Wilson generated and filed in 2014 a five-year plan in compliance with the Commission's rules, although the out years in the plan (years 3-5) are highly speculative in nature and thus will likely change, sometimes substantially, in future progress updates filed with the Commission. Reasons for the speculative nature of years 3-5 of the Plan include (1) the unknown nature of universal service support in those years, in light of the Commission's USF/ICC Transformation Order, (2) the difficulty in forecasting customer counts, demand, and other factors directly affecting network demand, and (3) the rapid pace of technological innovations in the communications industry makes it difficult to plan more than one or two years in advance with any degree of accuracy.

The *Progress Report* presented herein by necessity includes expenditures not directly tied to "improvements or upgrades" of Wilson's network, such as amounts for the maintenance and upkeep of existing telecommunications plant. In order for the Commission to accurately consider the capital and operating expenditures as related to and supported by the federal universal service programs, these types of costs are critical for such an understanding.

### II. Five Year Plan Update

Wilson has updated the five year service quality improvement plan it filed in 2014 as described below. The main reason for any updates to its five year service quality improvement plan relates to Wilson's revisions to capital and operating expense budgets due to a number of factors, including, but not limited to, market changes, regulatory requirements and uncertainty, and technological advancements.

Description	, 2015 (Jul – Dec)	2016	2017	2018	2019
CapEx	\$700,000	\$2,160,000	\$820,000	\$50,000	\$50,000
OpEx	\$1,700,000	\$3,500,000	\$3,600,000	\$3,700,000	\$3,800,000

During the first half of 2015, Wilson performed a FTTH build-out in the entire Sylvan Grove exchange with final cutover to occur in 2015. This investment, along with any associated operating expenses, affects 610 in population throughout Wilson's service territory, and covers approximately 142 square miles.

For 2016, Wilson plans to complete a FTTH build-out in the Hunter exchange. This investment, along with any associated operating expenses, will affect 230 in population throughout Wilson's service territory, and covers approximately 170 square miles.

For 2017, Wilson plans to complete a FTTH build-out in the Denmark exchange. This investment, along with any associated operating expenses, will affect 70 in population throughout Wilson's service territory, and covers approximately 49 square miles.

For 2018-2019, Wilson has provided a high-level estimate of the capital and certain operating expenditures necessary to maintain a high quality level of service. These necessary maintenance and operations expenditures will affect 3,700 in population throughout Wilson's service territory, and cover approximately 988 square miles.

### III. Progress Report

### A. Maps

Section 54.313(a)(1) requires that all recipients of high cost support are to provide maps depicting the progress made during the current reporting period. Wilson is providing a map below showing progress in regards to its five year service quality plan through June 30, 2015, and is provided at the wire center level.

### B. Universal Service Support Received

Section 54.313(a)(1) requires that all recipients of high-cost support provide an explanation of how much universal service support was received during the reporting period. For this year's Progress Report, the amount of universal service support received will be for the 6 months ended June 30, 2015. Wilson received the following universal service support amounts during the period January 1, 2015 through June 30, 2015:

Description	Amount Rec'd Jan - Jun 2015
High Cost Loop Support	\$1,063,066
Safety Net Additive Support	\$34,734
Interstate Common Line Support	\$539,184
CAF-ICC Support	\$31,278
Total	\$1,668,262

Of the total amount of support received shown above, Wilson estimates that approximately 35% was used for capital expenditures and 65% was used for operating expenditures.

# C. How Universal Service Support Was Used

Section 54.313(a)(1) also requires all recipients of high-cost support to provide an explanation of how the universal service support received was used to improve service quality, coverage, or capacity. The universal service support received by Wilson is either based on (1) actual overall revenue requirements, as determined by associated FCC rules, or (2) the replacement of certain interstate and intrastate access revenues. This support is added to Wilson's general funds and the expenditure of such support is not separately tracked, nor is it practical to do so.

Overall, any support expended pursuant to the investment and operating expense budgets presented in Wilson's five year service quality improvement plan will be used to increase coverage and capacity, via additional investment in voice and broadband-capable infrastructure, and improve service quality, via expenditures for continued operations and maintenance. By the very nature of the FCC rules that give rise to the universal service support received, Wilson clearly expends such funding to support regulated operations and thus serves to improve broadband and voice coverage, capacity and service quality. Therefore, due to the reimbursement nature of the HCLS and ICLS mechanisms, all support received was already expended to increase coverage, capacity and service quality improvement through qualifying capital investments and the qualifying operating expenses that support them.

# D. Network Improvement Targets

Section 54.313(a)(1) requires all recipients of high cost support to provide an explanation of any network improvement targets that have not been fulfilled in the prior calendar year. Since Wilson filed its initial five year service quality improvement plan in 2014, there is no prior calendar year upon which to report at this time.

#### IV. Considerations

The investment and service quality improvement plan and progress report discussed above were generated, in part, to meet or exceed the broadband public interest obligations adopted by the Commission:

- Speed at least 10 mbps upstream and 1 mbps downstream in regards to requests for service beginning in 2015. This reflects the Commission's recent decision to increase the standard broadband speed from 4 mbps /1 mbps.
- Latency 100mS or less, sufficient for real-time applications
- Capacity Wilson currently provides an unlimited monthly usage allowance to its broadband service customers.
- As an RoR-regulated carrier, Wilson is required pursuant to 47 CFR § 54.313(f)(1)(i) to provide broadband service at 10 meg/1 meg upon reasonable request and within a reasonable timeframe. As a result, the Plan and Progress Report reflected herein takes into account this requirement by meeting all such requests for broadband service within the overall service guidelines adopted by Kansas Corporation Commission.
- Wilson determines into which areas the extension of its network is feasible by analyzing relevant factors such as population, demand, costs, likely revenues, regulatory requirements, predictable universal service support, and availability of work force and materials.
